DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-9 are rejected under 35 U.S.C. ***112***, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As concerns claim 1, it is not clear as to how the three regions are connected to one another, i.e., the second region attached to a distal end of the first region, etc.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. ***102(b)*** as being anticipated by ***Featheringham 3,007,662.***

Featheringham sets forth a bracket 32 comprising a first flat region and fastener 22 capable of attaching to a building; a second (middle) region capable of spanning over a gutter, and a third region 40 capable of receiving and supporting a rung of a ladder; the first region being in the form of a planar sheet metal that is bendable and including securing points (inclusive of member 36). The applicant should note that product-by-process limitations within apparatus claims (such as "the bracket being molded") are NOT given patentable weight.
